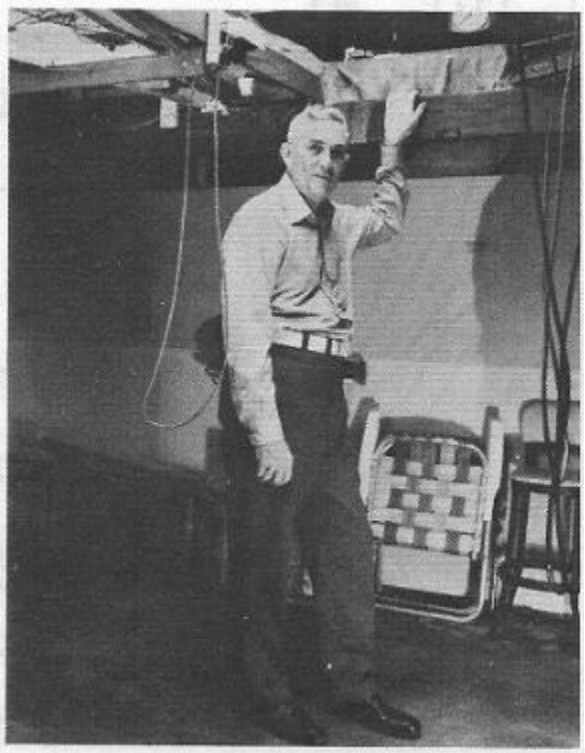
MMR_0071 Louis Queyrel



The layout is suspended from the garage ceiling. Here Lou prepares to lower the Frances Lines to its operating height.

THE FRANCES LINES

by Lou Queyrel, MMR
Photos by Gary Wilson

First operation on the Frances Lines began late in 1958 nearly twenty years ago. This layout, my second, has served me well because of some fundamental quidelines that were established long before the first spike was driven. The layout plan incorporates features right out of Frank Ellison's marvelous book, "On Model Railroads."
